Does it make sense to love dogs and eat pigs?

If I am concerned about the environment, should I eat packaged food?

Should I buy food from companies that don't pay a fair wage?

Who and what we eat reflects, and has consequences for, who we are as individuals and as a society. This course will examine some of the ethical concerns related to the conditions of human and other animal beings involved in the production of food. Animal welfare and environmental issues will be a central focus. Some specific issues will include: the environmental impacts of farming, livestock welfare, food waste, food safety, and food justice. Students in this class should bring their own questions and concerns about food to shape the reading and discussion.
