TEACHING

Courses (since 2003)

Child and Family Practicum (CPSY 609). Taught as a year-long seminar and practicum experience, this course trains doctoral students in psychology to work directly with children and families in the Child and Family Center clinic, which serves approximately 50 families a year from the local community.

Child and Family Intervention (CPSY 642). This course is taught annually and is designed to teach graduate students theory and research that supports empirically based interventions with children and families.

Ecological Bases of Behavior (CPSY 610). This course was designed for graduate students to provide a background on research and theory that examines the influence of various contextual experiences as they predict healthy development and outcomes for youth.

Doctoral Seminar (CPSY 601). This year-long seminar is designed to support students in research, writing, and professional development as they move through their doctoral training program in Counseling Psychology.

Dissertation Committees: Have served on over 100 dissertation committees, which includes those I have chaired, served on as a core member, or served on as an external member. External membership has included committees in school psychology, special education, and the psychology department.
